The **Caregiver Assistance Program (CAP)** is a program that provides in-home services to seniors at risk of placement in a nursing facility. CAP is designed to supplement the assistance an individual receives from his/her natural support network. Qualified individuals may have the opportunity to hire their own eligible family, friends, or neighbors to provide the care they need.

By designing service plans uniquely tailored to the individual, CAP works to enhance the individual's community care options. CAP also strengthens the ability of caregivers to continue in their vital role as primary support providers.

Where To Apply

Application for CAP is a two-part process. First, financial eligibility is determined; second, functional eligibility is evaluated.

For details on where to apply in your county, please contact your local New Jersey Easy Access Single Entry (NJ EASE) agency.
